

## **Glues division responsible management**

For the Glues Production Unit plant in Buja (Udine), Fantoni S.p.A. is subject to regulations on Major Incidents Risks as a Chemical plant. The company, as well as maintaining a high HSE (Health, Safety & Environmental) standard, has an ongoing commitment to responsible and sustainable management of its activities, with maximum focus on safety and safeguarding of the environment. All this is guaranteed by Fantoni S.p.A. thanks to the high and constant level of safety in its plants.

With a view to this, the company defines as primary values for its corporate culture the operations of the production unit, relations with the public and with its staff.

Fantoni S.p.A. puts this approach into practice with the implementation of a Safety Management System for the Prevention of Major Incidents according to European and Italian standards, which allows ongoing monitoring of all its production processes. The Management System is implemented with the aid of software technologies which enable accurate monitoring of all the core business and outsourcing processes.
